SCOPE OF CONTEST

The contest will be geared toward wedding cake design and decorating skills in a commercial bakery and requires a cake blueprint to be turned in for judging at the start of the contest. Each team will be judged on the construction and decorating of a 2-tier or 3-tier wedding cake to be used for wedding reception. For Regional contests, contestants may opt for a 2-tier or 3-tier cake. For the State competition, a 3-tier cake is required. The design of the cake must be original.

Contestants will provide a blueprint or drawing of their design to present to the judges. The design must be clear and legible with labels used appropriately. It is strongly suggested to include multiple views of the design (i.e., top, side, front, etc). All contestants must also provide a hard copy of their resume to the judges.

Each team will receive two 6-foot tables for their contest space. No electrical tools may be used, and electricity will not be provided. Contestants will be responsible for bringing all supplies and materials needed to perform the contest effectively. The cake must be tiered and may be stacked or separated. All decorations must be prepared at the competition. No pre-made decorations are permitted and all decorations must be edible, except for tier separators. The use of food colorings is permitted.

Teams will have 3 hours to construct and decorate their cake. Cake layers must be pre-baked. No time extensions will be allowed, and teams will be judged on their performance when time expires. During the contest, both contestants must actively participate in the assembly of the cake. Teams must work independently, without assistance from judges, teachers, fellow students, or observers. At no time will students be allowed to talk or otherwise communicate to their instructor once the competition begins. They may consult with judges and their partner only.

No observers, advisors, instructors, or students will enter the contest area or talk or gesture to contestants. Judges may penalize or disqualify contestants who communicate with observers.

Teams are expected to clean as they go. Sanitation is an evaluative criterion used throughout the competition. Work area and all tools, utensils, and equipment should be clean and organized. Each contestant is also expected to assist with the overall cleanup of the competition area at the end of the contest. Failure to do so will result in a deduction from the team's sanitation score.
